

## Network of excellence MARINE GENOMICS EUROPE

### Data release policy

Approved by the SSC

*Data accessibility within the network is the researcher's concern. However, the data produced through projects funded by the Network and the data generated through the use of Technological platforms and/or the Bioinformatics platform must be accessible to all network partners. Specific material transfer agreement could be produced by FIST upon demand for ensuring non-disclosure. The rule established is that all data release needs the agreement of the PI scientist but 6 months after automatic annotation, the data must be released to public domain unless particular concerns (such as patent procedure) are declared. In that case a specific request has to be sent to the IPUD committee which will take a final decision in conjunction with the SSC .*

#### Composition of the IPUD committee:

FIST: Frédéric legros (marine-genomics-europe@fist.fr)

Garching Innovation GmbH (GI) (Link@garching-innovation.de)

Prokaria, Viggo Marteinson (viggo@prokaria.com)

CNRS, Bernard Kloareg (kloareg@sb-roscoff.fr)

IFREMER, Joel Querellou (Joel.Querellou@ifremer.fr)

The Israel Oceanographic & Limnological Research, Esther Lubzens (esther@ocean.org.il)

University of Barcelona, Pedro Martinez (pedro.martinez@ub.edu)
